

  
**Outdoor Places**

Making The Most Out Of **Outdoor Spaces**.

## OVERVIEW

From nursery play areas through to primary trim trails, sports areas or landscaping of outside learning areas and much more. Range of projects goes from domestic artificial grass projects right through to complex building works, large playgrounds and play areas. Outdoor Spaces can offer a diverse range of solutions for your outdoor space requirements.

## OUTDOOR BESPOKE WOODEN STRUCTURES

Elevate the aesthetic appeal of your school playground, leisure centre, or public space with these visually stunning wooden structures, such as gazebos, canopies, lodges and outdoor classrooms. Designed for effortless installation, these buildings seamlessly blend form and function. Crafted to be watertight and weatherproof, these shelters provide a reliable and durable solution that not only complements the surroundings but also offers a versatile space for educational activities and social interactions.

## MULTI USE GAMES AREA

Create a versatile games area suitable for a variety of sports including football, hockey, basketball and netball. Whether you need a brand new structure or refurbishment of an existing area, you can create a space to fit your exact requirements.

## ENCOURAGING OUTDOOR PERFORMANCE

Outdoor seating is a great way to encourage children to share ideas and work together to solve problems. Available in a variety of shapes and sizes, the outdoor seating range can also be customised to your school, finished in your colours or inscribed with motivational quotes.

## INNOVATIVE WAY TO ENCOURAGE EXERCISE

Outdoor Places' large range of gym equipment has been designed to allow young people to exercise in a fun, attractive environment, offering accessible alternatives based on traditional gym exercise machines especially for children.

## WHY CHOOSE OUTDOOR SPACES?

A complete project service from conceptual design stage through to installation. Bespoke outdoor play and sports solutions across a range of sectors. The only major building material is both renewable and sustainable, as well as wood being a natural insulator making it ideal for energy conscious organisations. Enhance any school playground, leisure centre or public space. Can accommodate a whole class, enhancing education and social interaction.
