Cutting-Edge Flexible Solutions To Interactive Projection.

OVERVIEW

Interactive solutions covering mobile, portable sensory systems, to all-in-one wall mounted interactive floor projections. Cutting edge interactive systems, including interactive floors, are ideal for any special needs environment and are particularly sought after within the educational special needs sector to stimulate children's responses, and more.

INTERACTIVE FLOOR PROJECTION

Integrating cutting-edge technology with an elegantly simple design, the mobile interactive floor projector offers an economical and fully portable solution tailored for both school and home settings. The floor projector creates colourful, engaging floor projections which respond and interact to body movement. The unit creates a complete sensory zone by allowing even those with limited movement to alter many aspects of their immediate environment. Any image, video and audio file can be added to the many effects available, enabling teachers and parents to design specific content for individual users.

ULTRA PORTABLE PLUG-IN AND PLAY

Lightweight and easy to move from room to room, the SENse Micro offers instant & plug and operation with no setup required. Ideally suited for use in a classroom, or at home, the SENse Micro creates stimulating projections which interact with movement and touch.

UNIT SIZES FOR INTERACTIVE TABLE USE

The SENse Flex is a mobile, portable interactive sensory system, that can do a range of interactive projection sizes, and can do table projection as well as floor projection.

MULTI-TOUCH INTERACTIVE TECHNOLOGY

With two powered columns which raise and lower the LCD screen and with its ability to rotate to any angle, from horizontal to vertical and beyond, the Visilift is the ideal solution for those users who are unable to access traditionally mounted interactive screens.

WHY CHOOSE INTERACTIVE PROJECTION?

Mobile, portable interactive sensory system can do a variety of projection sizes including floor and table projection from the same unit.

Any image, video and audio file can be added to the many effects available enabling teachers or parents to design specific programmes for individual users.

SENse Micro offers instant & plug and operation with no setup required.

Stimulate children's responses, cognitive understanding and recognition abilities.
