

Sanitiser Sentinel has been designed to attract and encourage people to use hand sanitiser stations and soap dispensers.

Sanitiser Sentinel supports Infection Control by using a PIR sensor to detect people passing a sanitiser station.

When the sensor is activated a voice message is played and LED lights will flash to highlight the dispenser.

# SANITISER SENTINEL®

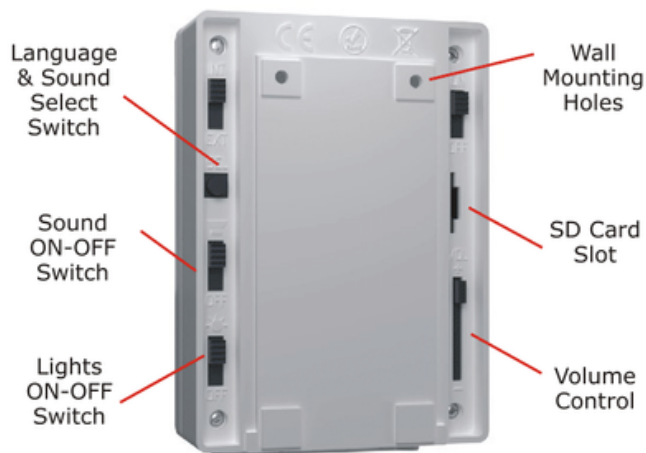

## **Reinforces Infection Prevention & Control Procedures**

Sanitiser Sentinel is a stand-alone unit that can be easily placed above or close to any hand sanitiser or soap dispenser.

An audible reminder to wash or sanitise hands will reinforce hand hygiene in any environment, without the need for staff to be present.

Sanitiser Sentinel will help you safeguard your children, staff and visitors against viral and bacterial infections.

26 pre-recorded messages including 20 different languages and 3 musical alert tones. Optional languages include German, French, Spanish, Italian, Polish, Dutch and Portuguese.

## **Options to store and play your own custom voice messages**

One set of 4 C cell batteries will provide over 200,000 operations, which is the equivalent of 5 years. 400,000 operations can be achieved in voice only or light only mode.

**Locate above or close  
to any existing dispenser**

**"Please sanitise your hands"**
